

DMG Series Mechanical Strength Evaluator

Specification Sheet
SS-FM-3009-0906
September 2006

The CHATILLON® DMG Series is ideal for functional capacity evaluations and basic muscle strength measurements where economy is required. This compact, easy-to-use force gauge is designed for physical medicine, occupational medicine and sports medicine applications and general patient assessment in family, neurological and orthopedic practices. Simplicity was a key design criteria for both clinicians and technicians. Measurement accuracy is better than 0.5% full scale. A large, easy-to-read, dial indicator displays peak strength. The gauge is available in 200 lbf and 500 lbf capacities. The DMG gauge comes standard with carrying case, handle assembly and NIST Certificate of Calibration with data. A variety of testing fixtures are optionally available.
